Notes:

The above figures are journeys made separately by mode as described in the Help Guide. In 2006 journeys were not counted separately by mode (bus-tramway-metro). To make a comparison with 2006, please note that the 2008 journeys calculated with the criteria of 2006 are 169 millions (bus+tramway+metro). Suburban Railway includes all journeys made on our trains; also those originated from/destinated to stations outside the PTA area (it was the same in 2006).
